

Unit #1 - Being a Scientist

Name: _____

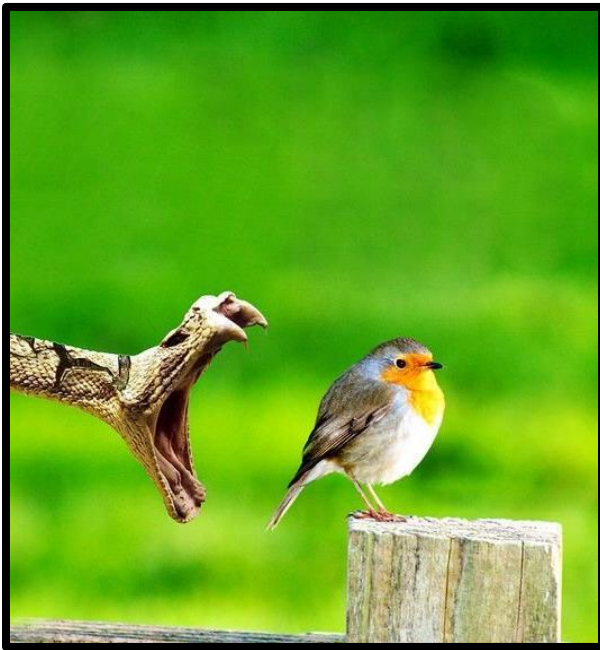

Date: ___/___/___ Period: ___

Practice Quiz - Observing, Inferring, & Predicting

Part 1 – Analyze

Examine the photograph below. Then, read each statement and decide if it is an observation, an inference, or a prediction. Circle your choice for each statement.

1. There is a green background.
Observation Inference Prediction
2. The bird is not real.
Observation Inference Prediction
3. The bird will fly away.
Observation Inference Prediction
4. The bird has yellow, orange, and blue feathers.
Observation Inference Prediction
5. The snake will eat the bird.
Observation Inference Prediction
6. The snake is poisonous.
Observation Inference Prediction

Part 2 – Evaluate

Examine the photograph on the left. In the space below, state two observations, one inference, and one prediction about the photograph.

Observation:

Orange cones; dirt; large machine; stone; cement walls; ladder; building and cars in background.

Inference:

A building is being built.

The building in the background is a school.

Prediction:

The new building will be a part of the school.

The new building will be a store.
